SANGAM UNIVERSITY

Vision

"We aim to serve the community as a non-profit and self-sustained institution that will provide an educational platform to the aspiring individuals and strive to create and improve upon the career opportunities for them. We hope to be playing a lead role as one of the best Universities in India in the next decade."

from the Editorial

We feel privileged today to introduce you to the first magazine of the Sangam University- Education Quotient (EQ). It was an immense pleasure to work upon the magazine. EQ will aim to provide information of the youth, for the youth, by the youth along with information about the current and future trends relevant to education and work environment. This magazine is a bandwagon of various activities, events, academic achievements of Sangam University. It is a platform for the members of the University to freely express their thoughts, experiences and

speech. The Theme of the Magazine is "Education in Bhilwara".

The creation and editing of this review has been an exciting journey and a great responsibility. We, the editorial team have added finishing strokes to what is actually the work of many; the final outcome of our efforts is now in your hands, so let the pages speak for themselves. We extend our wishes to the entire budding writers, who penned the articles.

Happy Reading!!!

Mission

"We are committed to provide an educational environment that is competitive, current and in tune with the needs of the global markets thus creating ample opportunities in employment sector within the state and the country as a whole."

Education is an important platform for every individual as a means of gaining knowledge.

Shri R. P. Soni

Chairman, Sangam Group of Industries, President of the Akhil Bhartiya Maheshwari Samaj - a successful entrepreneur, and a true Philanthropist. We could not think of a better idea than to start the magazine with sharing the views of the man who is not only behind the show but dared to dream and contributed to the development of the young through the establishment of Sangam University.

interview with the
Chancellor

From where did you get the inspiration to set up Sangam University?

"I understand education is an important platform for every individual as a means of gaining knowledge. I feel that every person should be given an equal opportunity to study further and has the right to pursue his dreams. During my education, I had to go far from my family in order to pursue my dreams. The lack of opportunity to get good education and stay connected with my family during my growing years made me realize and promise myself that if I were given the opportunity to provide quality education in the city, I would. Sangam University is a creation of this realization."

What drawbacks have you observed in Bhilwara's education scenario? What vision do you have for the role of Sangam University towards the growth of Bhilwara?

"Bhilwara has a dearth of high quality educational institutes. People realized this and sent their children out to study, including myself. I knew this need had to be met with. Soon, we started with Sangam School of Excellence and ITM. However, at the college level, we recognized that the traditional model of education was difficult to change and in order to really achieve what we set out for, we needed to open our own University with our own systems. I am certain that with the team we have and the freedom to educate youth beyond theoretical knowledge, we should be able to equip students with knowledge and skills relevant to the marketplace. More employment will result in greater per capita income of the city as well as the nation."

What are your expectations from Sangam University?

"The university needs to focus on preparing students that are multi-talented, tech-savvy and confident. While the faculty is expected to ensure that the fundamentals of the students are clear, strong, and hands-on; should not be confined to books. The faculty is continuously encouraged to interact with the field experts to understand what is demanded by the industry. Sangam University needs to prepare students that welcome and face challenges confidently and pave their way to the pinnacles of glory."

Last but not the least, what message would you like to give to the existing and prospective students of Sangam University?

"I believe that everyone is gifted with some unique qualities. Some are born to be leaders and have the courage to be young entrepreneurs. I urge the students to believe in themselves and think beyond their comfort zone. Even though luck plays a role, it will only give you a chance. Make the most of that opportunity, coupled with hard-work, determination and confidence- success will follow. I'd also like to add, that while you train yourselves to be excellent scientists, technologists, thinkers and leaders of the society, we hope you will find the university to help you mould into better human beings. Our commitment and dedication has been towards an all-round development of the students, and we will continue to strive towards excellence."

Good luck &

God bless!

President's Desk...

Prof. B. R. Natarajan
President
Sangam University

confluence of not only intellectual and cultural values but also ethical values resulting in the development of leaders who know the way, go the way and show the way from diverse disciplines in various walks of life.

To achieve the motto of "Where Aspiration Meets Opportunity", the curriculum, in addition to being strong in fundamentals and rich in analytical techniques, would also focus on broad based multidisciplinary approach and co-operative work, integrated education, based on vibrant industry partnerships. Such a curriculum would enable the student to function more effectively not only in the chosen field but also prepare them for adapting to constantly changing circumstances, confront new facts and find innovative ways to encounter and solve new and unexpected problems.

The educational process at Sangam University also incorporates the best practices followed in top ranking Universities such as Semester System, Letter Grading, Continuous Internal Evaluation and Cafeteria approach to choice of electives. Goal oriented and time bound research at Sangam will be geared to be effective driver of scientific discovery in addition to the emergence of economically relevant new technologies based on system changing solutions.

I congratulate the editorial team for bringing out this magazine in a short span. I have no doubt that those responsible for the publication will maintain the highest standard of professionalism and make the magazine really worthy of the institution it represents."

"EQ"

to provide ample opportunities for the enhanced interaction and bonding of the triveni of university community comprising of faculty, students and alumni, thus enhancing the prestige of the institution.

"I am very happy to learn that Sangam University is launching the inaugural issue of the Magazine - "EQ" to provide ample opportunities for the enhanced interaction and bonding of the triveni of university community comprising of faculty, students and alumni, thus enhancing the prestige of the institution.

Success of an Institution undoubtedly begins with believing in one's worth, trusting one's insight, nurturing oneself, having a goal, devising the right strategies and spreading one's wings. Sangam University aims to accomplish the task of creation of future by facilitating the
